Release of WP2 Website

This document concerns the delivery of the WP2 (Networking for the High Energy Astrophysics Community) Website. The website is operational and its homepage URL is:

<https://webserver.javalab.ua.es/ahead2020/>

The website is compliant with GDPR.

For the **version 2.0**, the comments by the EC referee have been implemented. The website has been updated. The activities belonging to the previous AHEAD (meant only to give a sense of continuity) have now been removed. The Workshops have been updated with links to the corresponding sites. The Schools page is still empty because no School has still been carried out due to the pandemics situation. Contrary to workshops and conferences, no online option has been yet adopted for the Schools due to the fact that: a) they are addressed to young people (students) where the interaction with the teachers and other mates is considered very important and effective to acquire the desired knowledge and b) because of the schools focus on hands on sessions. Therefore we prefer to defer the schools for the second part of the project, hoping for a better situation. This is all right, as the space missions the schools are related to, are still well in the coming years.

In addition, we plan to implement the following changes in WP2 web site:

- List all the planned Workshops, using a separate list from those already carried out or with dates firmly established.
- List of all the planned Schools.
- In the Selection Panel page: keep only the names of the chairs.
